SUMMARY

Full Stack Developer with expertise in Vue.js and React for frontend and hands-on Node.js experience for backend development. Passionate about crafting intuitive user interfaces and building robust web applications

EXPERIENCE

Software Developer (UI, Web-development)

1.Rudrani Infotech Pvt Ltd

📅 11/2019 - 06/2021

- Designed websites tailored for construction firms, enabling them to display their ongoing projects to clients.
- Developed web pages using HTML, CSS, and JavaScript to ensure a seamless and engaging user experience.
- Collaborated closely with senior developers to translate Figma designs into pixel-perfect web layouts.
- Ensured responsiveness across various devices, enhancing accessibility and usability for clients and stakeholders.

Software Developer (UI, Web-development)

QuinStreet

📅 07/2021 - Present   📍 Pune,India

QuinStreet: A top digital marketing company connecting businesses with high-intent customers, using data-driven solutions for growth.

- Revenue Checking Portal Development
  Spearheaded the design and development of a comprehensive revenue checking portal for company employees, providing a centralized platform to monitor and analyze performance data from various marketing channels, including Facebook and Google Ads.
- Used design tools like Adobe XD to transform wireframes and mockups into interactive UI components. This was achieved through Vue.js and the Quasar framework, ensuring a pixel-perfect implementation and delivering a seamless user experience.
- Seamlessly interconnected diverse UI components to meet specific project requirements, allowing users to access and analyze critical data efficiently.
- Advanced Routing Implementation
  Designed and implemented a sophisticated routing system to navigate different sections of the application, enhancing user accessibility and usability.
- Micro Frontend Integration
  Successfully introduced a micro frontend architecture into the existing application, improving modularity and scalability
- Integrated APIs using Axios and Fetch to fetch data from various sources and present it in the form of dynamic charts and reports, enabling data-driven decision-making.

Frontend Developer(Freelancing)

Neast-App

📅 03/2023 - 07/2023   📍 Remote

- Independently developed a high-capacity exam portal for 22k concurrent student exams.
- Collaborated closely with Prof. HC Verma (Padmashree) to meet project requirements and specifications.
- Utilized cutting-edge technologies, including React, TypeScript, Tailwind CSS, and CSS, to build the platform.
- Created a user-friendly and efficient time-based exam system for students.

SKILLS

Client-Side

HTML CSS JS Vue React

Micro-frontend Vuex TypeScript

TailwindCss Quasar Bootstrap

Server-side

NodeJS ExpressJS MongoDB

Mongoose App-write

Development & Operations

Perforce Jest Scrum Agile

GIT

PROJECTS

MERN Stack project of Crypto currency

🔗 https://github.com/shardulparlikar/crypto-Mern-App/tree/main

- MERN Stack project of Crypto currency — Full stack project With CRUD operation made in React Express MongoDB, Node ,API

STRENGTHS

Communication

Attended a Communication course at **MIT**.

EDUCATION

B.E. in Computer Science

BAMU

GPA **3.2** / 4.0

- MGM, JNEC - 2019
